

**RETRACTION**

**Agócs et al., Role of domain interactions during the amyloid formation of yeast phosphoglycerate kinase, Acta Biologica Szegediensis, 50(1-2):45-48, (2006)**

The article entitled “Role of domain interactions during the amyloid formation of yeast phosphoglycerate kinase” by Agócs G, Jäckel M, Fidy J, Osváth S, which appeared in Acta Biologica Szegediensis 50(1-2):45-48 (2006), has been retracted following a review by the Editorial Board. It has come to light that, due to an error from the first author, this article was published although there is a significant overlap with an article that had already appeared in Proteins: Structure, Function and Bioinformatics 62:909-917 (2006).”
